About

I'm a junior Full-Stack Software Engineer with hands-on experience building web and mobile applications using **React.js, React Native, and Next.js**. I enjoy creating clean, intuitive user interfaces and translating product ideas into functional applications.

On the backend, I work with **Node.js, Typescript, Express.js, Nest.js, Java, and Spring Boot** to build RESTful APIs and support application logic. I've gained practical experience through hackathons, bootcamps, and academic projects, working collaboratively in team-based environments.

I'm fluent in **English and French** and motivated to grow in fast-paced engineering teams.

Skills

Frontend: React.js · React Native · Next.js · Tailwind CSS · Expo · Redux · Zustand ·

Backend: Node.js · Typescript · Express.js · Nest.js · Java · Springboot · REST APIs

Languages & Frameworks: TypeScript · JavaScript · Java · SQL

Databases: MongoDB · MySQL · PostgreSQL · SQLite

Experience

Co-Trainer — React & React Native Development Bootcamp

React & React Native Dev Bootcamp (Cohort 5)

- Assisted in training 20+ participants in React.js and React Native
- Explained core frontend concepts including components, state, and hooks
- Supported learners during hands-on coding sessions and debugging
- Helped participants understand industry expectations and best practices

Frontend Developer

MammyHealth (Pregnancy & Maternal Health Platform) — onsite (Cameroon)

(May 2026 - DATE)

- Built a scalable **cross-platform mobile application using React Native (Expo Router)** focused on providing **pregnancy and maternal health guidance for expectant mothers**.
- Designed and implemented a **component-based UI system** (ArticleCard, GuideCard, Avatar, headers), ensuring consistent and reusable interface patterns across educational and community features.
- Developed a **structured health content system tailored for pregnancy education**, enabling dynamic rendering of articles, tips, and guided information for users at different stages of pregnancy.
- Implemented **parameter-based navigation and deep linking flows**, allowing users to access detailed pregnancy articles and personalized content through ID-based routing.
- Designed a **guided user experience flow for expectant mothers (health check / onboarding gating system)** to personalize access to relevant pregnancy-related content.
- Structured the frontend architecture using **modular and reusable components**, improving scalability for adding new pregnancy-related modules such as guides, articles, and community discussions.

Leadership

Public Relations Officer — Google Developer Group on Campus (GDGoC)

University of Buea | Aug 2025 – Aug 2026

- Serve as **PRO**, coordinating communication and outreach activities
- Engage potential sponsors to support community tech events
- Contribute to building a strong student developer community

Core Team Member — Hult Prize

Dec 2025 – Feb 2026

- Assisted in student orientation and awareness campaigns
- Supported participation and engagement in the Hult Prize program

Education

Bachelor's degree in Software Engineering

Currently pursuing my B.ENG program where I am in my 3rd year

Spoken

Languages

- French (Native)
- English (Native)
